hackathon mentoring
made easy

Luiz da Silva

Could you please share if you got any help?

no, we didn't

I didn't have anyone respond

Hi Luiz, thx for reaching out. You are the first to respond to that message. By now I abandoned zk for this hackathon. Working on an integration of Internet Computer now.

hi, we did not get responses from mentors. However we don't need any technical assistance, we just would like to discuss our idea & solution

Requesting and getting mentor support can take a long time

It's hard to know upfront if a mentor has the skills to help with a request

Not enough mentors available

Our goal is to remove the barriers standing in the way of bringing mentors and hackers together in a quick and convenient way to fully maximize the potential of their project and hacking experience.

Allow anyone to become a mentor and provide support to their peers

A reputation system rewards mentors for their contributions
